Mr. Frank Wolfe, District #2, Email: fwolfe@co.pacific.wa.us

RE: County Revocation of Larson Permit Letter April 10, 2013

Dear Board of Commissioners:

I represent R. Terrance and Vicki Larson, and Larson Property Management, LLC, residents and taxpayers of Pacific County. I am in receipt of the County's revocation of "Land Application/Solid Waste Permit" letter dated April 10, 2013:

*The revocation has a high probability of causing catastrophic damage to the Larsons in their farming business and livelihood;

*The revocation will impact not only present and future legal and legitimate business interests, but has the potential to cause breaches of promises or contract already undertaken.

It is the spring soil preparation and planting season; these activities must occur now, or the season is lost.

I urge the County to reconsider the revocation, at least until such time as the Larsons can comply with the findings of the Department of Ecology regarding the alleged deficiencies in the County's permitting process. I have been provided with no "findings" or other empirical data remotely supporting the determination to immediately and capriciously terminate the Larsons' right to fertilize and farm their property, in the same manner it has been fertilized and farmed for decades--with county permitting, approval, and support.

The Larsons have always complied with every state, federal, or local requirement. They have pursued their business and commitments in reliance on the county's permitting authority and the county's compliance with applicable statute and regulations.

The economic impact of the revocation will be immediate. The impact on complainants in allowing the spring fertilization and planting to proceed in the interim will be, based on the data provided, negligible. Unilateral and possibly extralegal decision-making processes will not resolve this matter.

Yours truly,
